

GSMST

2017-18 | Supply Lists for Grades 10-12

School supplies for GSMST students in grades 10-12 should be kept with the student. [If a class wide need for materials arises during the year, perhaps to provide for a special project or curricular opportunity, that information will be shared by the individual teacher or subject team involved.]

Purchase Once and Reuse Each Year	Items Needed Every Year
Molded Ethernet Cable (3-6')	3-Ring Binders (1 per course)
USB Drive (16 GB or larger)	College Ruled (loose leaf) Notebook Paper
Plastic or Metal Ruler (with metric units)	Pens (Black/Blue) and Pencils (#2 equivalent)
Plastic or Metal Protractor (without swing arm)	Colored Highlighters
Colored Pencils	Graph Paper

Calculators:

The calculator that GSMST students need any particular year depends largely on the math class in which the student is enrolled. Once students reach Accelerated Pre-Calculus or higher, they will need a TI-83 or TI-84 family graphing calculator. Prior to that course students can survive with almost any scientific calculator. A large number of students simply choose to purchase a TI-84+ or a TI-Nspire early in their GSMST career and properly maintain it through graduation and into college.

Classroom Supplies (specific by grade level):

10th Grade	11th Grade	12th Grade
Engineering Computation Paper	Index Cards	Index Cards
2 Quadrule-ruled notebooks [Sold during lunch, weeks 1-2 of school.]	White Board Markers	
	Post-It Notes	
4-function calculator with SQRT key
